

# Scm Group at Domotex 2017 with the best integrated solutions for flooring production

Hanover, 14 to 17 January 2017  
Hall 7 - Stand B37

**Scm Group**, the world leading producer of woodworking machinery and systems, is to participate in the **Domotex** trade fair, the most important international flooring industry event of the year, running from **14 to 17 January 2017** in Hannover.

With over 50 years of experience, **Scm Group** is an expert in the production processes, acclaimed around the world for its ability to offer complete integrated solutions that meet the real needs of the industry. A commitment to excellence that SCM has always demonstrated with continuing **investments in R&D**, which have allowed it to offer a complete range of solutions fit for **any type of flooring product or material** according to the latest market trends: vinyl, cork, ceramic and wood-based materials, as well as wall cladding products.

**The Scm Group technological solutions include modular advanced machines that can operate as parts of complete production lines.**

**Celaschi Team, the new profiling machine with unrivalled productivity.**

Team executes profiling at speeds from 40 to over 250 m/min, manufacturing parquet flooring of a wide range of materials and with different joints: solid wood or 2-3 wooden layers, MDF and HDF coated with melamine-laminated, ceramics, LVT, PVC and cork, with lengthwise and crosswise joints with T&G, Click 2G and 5G profiles. Thanks to a **new feed chain**, Team processes planks with minimum width as from 90 mm, at a maximum speed of 150 m/min, for a performance at the highest productivity level with reduced costs.

The **DMC System sander** is a modular machine that can be used to create multiple and innovative finishing effects, thanks to its support structure which can hold up to 10 operating units.

**SERGIANI Las 230 Plus** is an automatic continuous-cycle press for the production of parquet (2-3 layers); and the **CPC packaging solutions** operate with cardboard boxes and shrink wrap films.

Among the finishing machines, the **Valtorta F1 roller coater** and the **Selecure UV curing machine** offer the best technological solution in the field of coating and of photo-polymerisation by UV irradiation.

**Make sure to come and see the Scm Group at DOMOTEX, Hanover, from 14-17 January 2017  
Hall 7 - Stand B37**
