

NEWS AND SOLUTIONS FOR PRESSING

sergiani gs and sergiani gsa: a complete range to satisfy all pressing requirements

The new SCM project starts from Nuremberg with the aim of strengthening the presence of SCM in the pressing sector with an even wider range of solutions in order to satisfy (customers of) all market segments.

The **sergiani gs** manual presses and **sergiani gsa** automatic presses range becomes even more competitive.

NEW RANGE OF ELECTRONIC CONTROL PRESSES

The new GS range designed to meet all customers needs: the best choice for panels and doors pressing.

The wide range of models and configurations suits every production requirement.

- **Control panel with Siemens colour touch screen**

The new control panel is equipped with a software that allows to automatically calculate the hydraulic pressure starting from the panel dimension and the specific pressure required, manage the heating system, carry out a complete diagnostic, program and save all working parameters and automatically manage the possible exclusion of a cylinders row.

- **Hydraulic cylinders**

The steel rod is chromed with a thick layer and rectified, flanges and gaskets are high resistance to guarantee long lifetime and perfect seal.

- **Structure quality**

The sturdy structure has been engineered with a high safety coefficient to guarantee the highest level of resistance and rigidity in each processing phase.
