TECHNODOMUS Rimini, Italy, 20.24th
April 2012

Dear Customer,

The **Technodomus** exhibition to be held in **Rimini next April 20-24** is imminent and will be the perfect chance to find out what Scm Group has to offer:

- Scm's widest range of [woodworking machinery](#);
- [production process](#) know-how, illustrated throughout the process routes set up on our stand;
- innovative **6-axis technology**, applied to the **Oikos by Routech** ([watch the video](#) at our new **Video Hub** section).

And more...

COME AND MEET PROFESSOR PAPPAGALLO!

In a reserved area of our booth you will discover the great potential of [Professor Pappagallo](#), Scm Group's latest innovation which makes technology easy! It's a **special software** – now installed on the joinery

cnc working centres and soon available on all cnc solutions – **provides for anyone to operate a machine if unskilled and inexperienced.** A helper available 24/7 to support you in production and troubleshooting: a few clicks on the screen, some voice commands and problems are sorted out.

REGISTER NOW WITH **SCM GROUP!**

Be our guest at Technodomus:

HOTEL RESERVATION

SAN PATRIGNANO TOUR

Departure by bus from the fair at 16.45 hrs and return at 19.00 hrs directly to the hotel, on April 20, 23 and 24.

Highlights at Technodomus:

passion

When art and design meet technology

Work of art on show created by famous architects like **Matteo Thun, Mario Botta, Karim Rashid, Philippe Starck, Claudio Bellini e Alessandro Mendini** and made with CNC working centre, in collaboration with:

RIVA 1920

The “**Briccole**”, oak wood poles used in the lagoon of Venice, created by **famous designers** and transformed into masterpieces thanks to Scm Group technology.

PININFARINA

The “**Cambiano**”, a luxury sports car by **Pininfarina** with interiors created with recycled wood from the “briccole” and transformed by the company **Riva 1920**

thanks to **Scm Group** technology.

SAN PATRIGNANO

By ‘learning by doing’, young people discover the art of **carpentry** equipped with Scm Group solutions. From “**interior design**” to “design made around people”.

SCM GROUP and SALONE DEL MOBILE (furniture show)

Today manufacturing technology means working in close connection with designers, architects and engineers, because the ultimate goal of technology is to design new ideas and in a simple way. Design and technology come together with Scm Group, Riva 1920 and San Patrignano, at the **Salone del mobile**, in Milan next April 17-22.

[Visit Salone del Mobile!](#)

technology Leadership in production process

A new way to communicate [integrated technological solutions](#). As "**SCM Group leader in production process**," the group demonstrates its leadership in providing complete solutions, for "turnkey" manufacturing of wooden products.

Technical solutions are more powerful and flexible through interactive tools, clear diagrams and 3D renderings. A unique ability of SCM Group to create the "**perfect factory**" for any type of finished product for wood and by-products.

The [CSR Studies and Research department](#) will be introducing, for the occasion, solutions to improve window frame sound insulation without neglecting key parameters such as: mass, costs, easy to process and materials accessibility.

performance Our solutions at work

Many **demonstrations** will be on show:

Joinery and bespoke solutions	Industry solutions
 TECH Z5 Multipurpose totem, pen holder sphere and visiting card case manufacturing	 ACCORD 40 FX Machining of 4 straight work pieces – counter-profile joints with dowels. Machining of 2 stair strings.
 CYFLEX F900
