

## **CMS Stone Technology plays a leading role at Marmomac with the new Brembana Venkon bridge milling machine**

*The SCM Group brand specialized in the working of stone materials confirms its leadership in the sector*

**CMS Stone Technology**, a brand of **Scm Group** specialized in the working of stone materials, presents, exclusively for the next edition of Verona Marmomac, the new bridge milling machine **Brembana Venkon**, able to offer unique cutting opportunities, which combines ease of use and topmost versatility despite a low investment budget. As a result of CMS's important and ultra-decade-long experience in the design and construction of CNC machining centres, **Brembana Venkon** is especially suitable for cutting natural, synthetic and ceramic stone slabs, due to its ability to perform straight, vertical and inclined cuts, as well as drilling and profiling.

The tradition of CMS Stone Technology, the undisputed leader in this sector, continues incessantly. Every year, at the Verona fair, it presents **innovative and revolutionary solutions**, thanks to its decade-long experience and advanced competence in the industry. Through its subsidiary **Brembana**, CMS was in fact the first manufacturer of a stone machining centre back in the 1980s. As with all **Scm Group** brands, for CMS Stone Technology transforming materials has always been a vocation, having contributed decisively to many industrial successes and fully respecting its mission: to create state-of-the-art solutions for all production sectors.

CMS machines have always provided unique solutions for any requirements related to the world of building, architecture and interior/exterior decoration, wherever the installation of stone and marble products is required.
