

Scm Group technologies featured at the Holz-Handwerk

*Nuremberg, March 16 to 19
Hall 10.0 – Stand 303*

SCM Group, a world leader in producing technologically advanced solutions for the woodworking industry, will be present at the 18th edition of the **Holz-Handwerk** trade fair, open from **16 to 19 March 2016 at the Nuremberg Exhibition Centre**.

Visitors will be welcomed in a **new exhibition space** of over 1,300 square metres dedicated to **the group's new products and solutions**. **"Strong Reasons Why"** will be the driving concept behind the entire SCM communication campaign at the fair. The idea is to focus on the **group's strong values**, which translate into **tangible benefits for operators**, and to demonstrate the company's ability to offer industry professionals an **extremely wide and complete range of woodworking products and solutions**.

The new stand reflects such key concepts as **brand identity, reliability and technological innovation**, enhanced by an impressive arrangement and an effective and elegant graphic design, which once again confirms the SCM Group ability to offer state-of-the-arts solutions that perfectly meet the needs of an ever evolving market.

Following its great success at Ligna Hannover 2015, Luciano Molinari's **"500 Kube"** returns to the SCM Group stand at Holz Handwerk to welcome visitors interested in machines for artisans and artists. With the "500 Kube" project, SCM Group fuels the passion for wood and helps transform it into art and design through the craftsman's creativity and the use of a technological perfect tool.
