

Maestro edgestore manager

Edge under control

Maestro edgestore manager

Software that allows management of all available edgings, keeping consumption and location under control.

It manages the entire inventory of edgings and their position in the different storage. It exchanges data with the company's management systems (e.g. MES) for a constant view of the available quantity.

It can be connected to all edge banders within the factory.

KEY HIGHLIGHTS

SIMPLE

All information regarding coils available at a glance.

EFFICIENT

Information on the remaining tape stock is always available with the automatic length calculation provided directly by the edge bander.

FAST

Reduced time at finding the correct edging tape thanks to the E-EDGE App that indicates where the edge is at all times.

CONNECTED

Connectivity with your company's software for organised edge management (api-rest communication protocol).

SMART

Adaptive to customer edge storage, DB-EDGE Web-App allows to simulate existing layouts and simultaneously manages the different storage of the company.

HOW IT WORKS

Edge database entering and coil storage

Data entry

Application of the identify label on coil

Coil storage

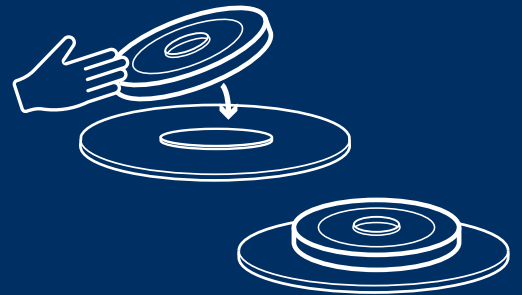

Coil seaking and loading on the edge bander

Coil tracking

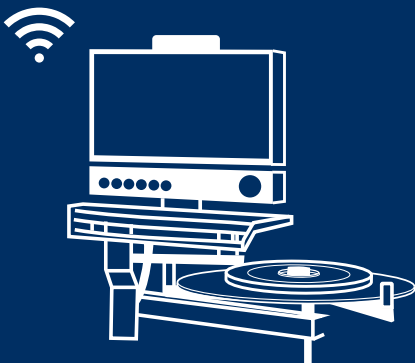

Coil picking

Coil loading on the edge bander

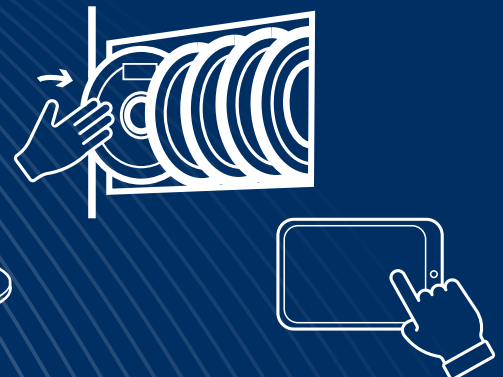

Use of the edge with automatic consumption calculation

Edge use and consumption calculation

Coil unloading

Coil position assignment in the storage

Maestro edgestore manager

WHAT IT INCLUDES

- Mini-PC for data base management
- Web-app **DB-EDGE** for edge database management
- App **E-EDGE** for coil storage management, installable on tablet (Android or IOS)
- Portable printer for coil labels
